Felix Touchte Codjo

PhD student in particle physics
Université Paris-Saclay
IJCLab — Laboratoire de Physique des 2 Infinis Irène Joliot-Curie

This is a draft.

Experience

PhD Researcher

IJCLab · Université Paris-Saclay — Orsay, Île-de-France, France — October 2024 – now

- Member of the CLAS Collaboration
- Develop monitoring, reconstruction, and calibration codes for the ALERT experiment
- Measure the Coherent DVCS off ^{4}He with ALERT and CLAS at JLab

Keywords: C/C++, Java, hadron structure, QCD, nuclear GPDs, DVCS, particle detection, data processing

Visiting Researcher

Jefferson Lab — Newport News, Virginia, The United States — March 2025 – July 2025

- Ensured the monitoring of the data during the run period
- Played the role of on-call detector expert for a 24/7 running accelerator

Keywords: Data taking, monitoring, target change, target purge

Research Intern

IJCLab — Orsay, Île-de-France, France — March 2024 – August 2024

- Included the hit digitization of ALERT in the Geant4 simulation of CLAS
- Implemented the decoding algorithm

Keywords: C/C++, Geant4, simulation, drift chamber, signal generation and processing

Engineering Intern

CERN — Geneva, Switzerland — May 2023 – August 2023

- Studied the linearity of the Outer Tracker for luminosity measurement during HL-LHC from simulation
- Studied the linearity of CMS luminometers with respect to the REMUS system

Keywords: C/C++, ROOT, simulation, luminosity measurement, calibration

Education

Université Paris-Saclay

Doctor of Philosophy - PhD, Elementary Particle Physics — October 2024 – September 2027

Université de Strasbourg

Master of Science - MS, Elementary Particle Physics — September 2023 – June 2024
(Double degree with Télécom Physique Strasbourg)

Télécom Physique Strasbourg

Engineering degree, Engineering Physics/Applied Physics — October 2021 – September 2024

CPGE Lycée National Léon Mba

Higher school preparatory classes — September 2018 – July 2021

Version date : October 10, 2026
